Capital: Ankara

ABOUT US

Canlar Fruit, established in 1989 with over 30 years of experience, became one of the leading Turkish fresh fruit & vegetable export companies with processing, packing and storage located in Antalya, Denizli and Bursa.

Canlar Fruit exports and supplies more than twenty thousand tons of fruit to its business partners in five continents with a priority of high quality, safety and sustainable service and fulfilling partner's needs at competitive price points.

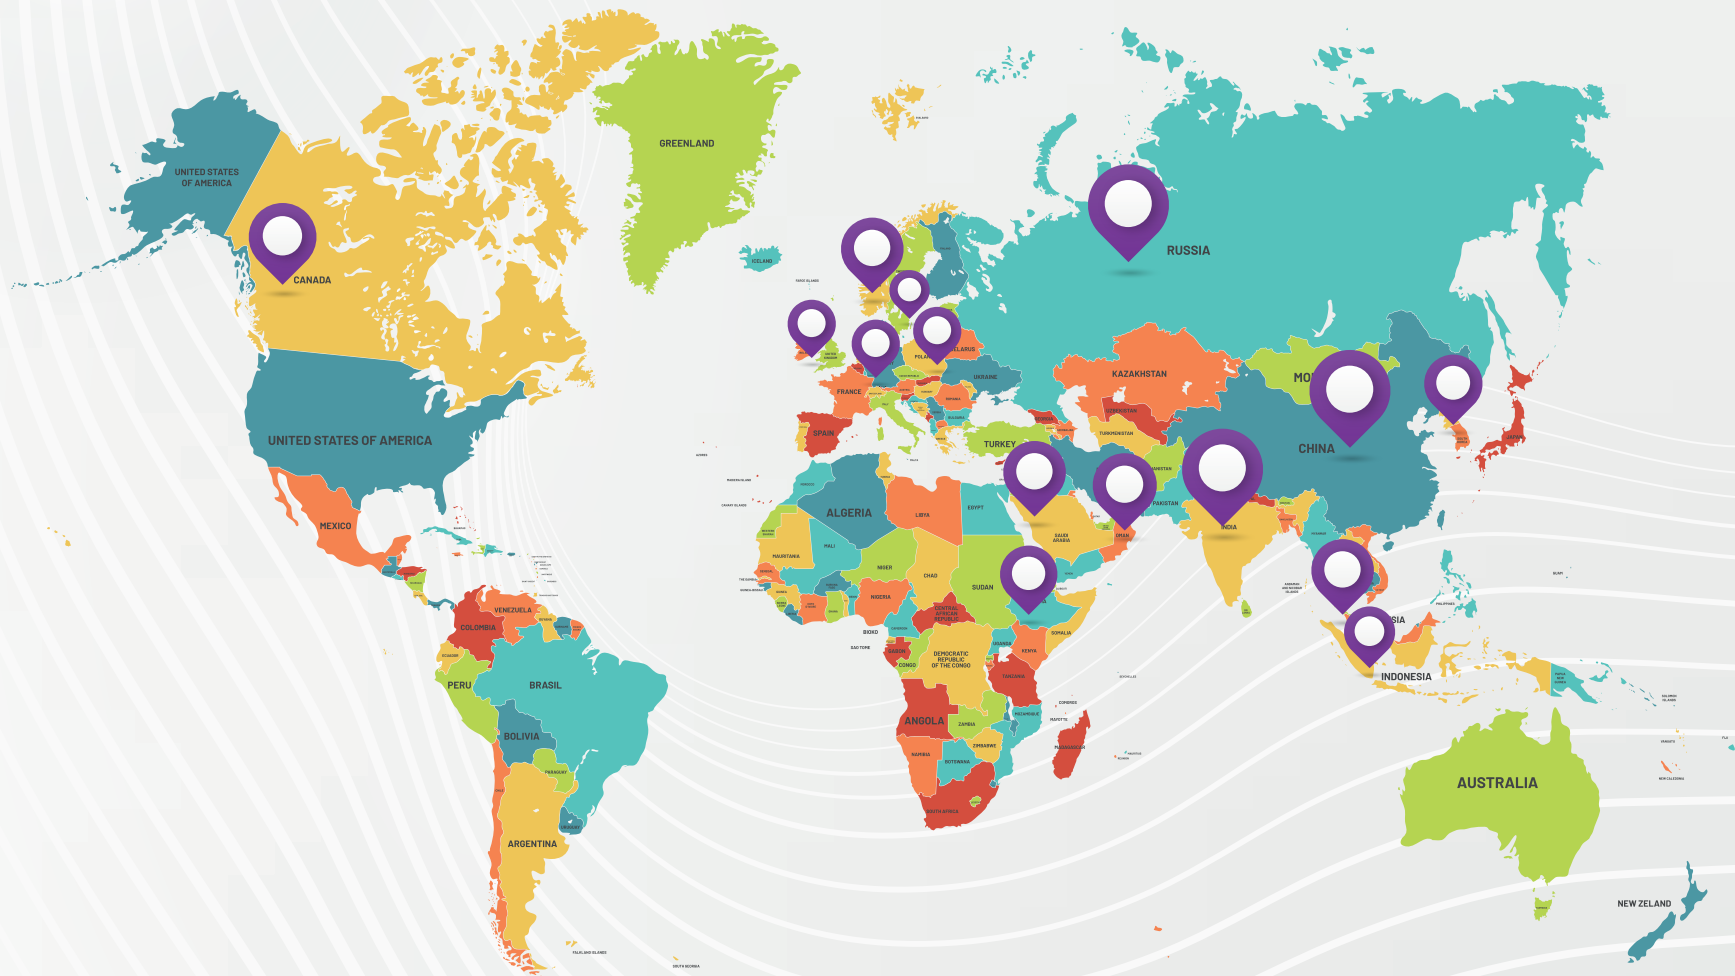

We endeavour to understand our customer's diverse needs and are committed to meeting them and ensuring maximum satisfaction. We are open to innovations, new opportunities, and ideas, so we constantly renovate our cold storage and packing facilities with the latest technologies and equipment.

We commit to ensuring that our fruits are fresh and meet the stringent food safety standards of authorities. To achieve that, we source from Premium fruit growers for their highest quality and ensure that all our clients' requirements are met. We prioritize food safety by providing pesticide control with special analyzes we do before and after harvest.

We aim to be a premium provider of fresh fruits on-demand where customers partner with us in mutually beneficial relationships.

"Let's grow together" is just not a simple motto, it's a part of life. In this context, we would like to special thanks to our valued growers, team and customers who have supported us since 1989.

WHERE IS CANLAR QUALITY IN THE WORLD?

FRUIT OPERATION

With our new investments and projects, we are ready for future.

In the 2021 season, Canlar Cold Storage Facility is in service with its 8000m² closed area and 4000 tons of storage capacity.

With Unitec Cherry Vision 3.0, the latest technology cold storages, cherry processing area, and loading docks, we supply our customers and consumers with the Canlar Fruit quality.

OUR PARTNERSHIP&BRANDS

Vegetable operation; Soylu Tarım Ürünleri Ltd Şti

Thanks to our experience in sector more than 30 years, we continue our investments on products and techonolgy in order to transfer our knowledge to future generations .

As Canlar family, in order to provide better service to our customers, vegetables and fruits we have separated our packaging areas and companies. We continue our activities with Soylu Tarım in the vegetable operation with our **solaris** brand.

As the Canlar & Soyluagri family, we are moving to our new home where it is close to Antalya International Airport and Antalya Expo area, end of June 2022.

This new cold storage facility has 8.000m² closed area and have a total capacity of 6,000 tons with -40°C cold shock, -18°C storage, and atmosphere control rooms.

We will continue to provide services to our valued customers in one of the few modern facilities in Turkey.

ENVIRONMENT POLICY

We are aware that this world is not limited to our lives and we aim to leave a greener world for the next generations. After all these technological investments, we continue to work to minimize carbon emissions and to ensure sustainable agriculture. In 2022, we will produce our own electricity with solar energy panels in our enterprises and make our world more livable.

We support the zero waste project with a waste management philosophy that covers the prevention of waste, the more efficient use of resources, the prevention or minimization of waste generation by reviewing the causes of waste generation, and the collection and recycling of waste separately at the source in case of occurrence.

Our goal is to minimize the use of zero waste and plastic.

CHERRY

Turkey is the world's largest cherry grower with its unique taste. Ziraat 0900 variety is in high demand from all over the world, especially in Europe.

We are pleased to increase our cherry processing quality and capacity and be the owner of Unitec Cherry Vision 3.0

We increased our hourly cherry processing capacity of 5.6 tons to 12 tons.

With Cherry Vision 3.0, we expect to increase our cherry quality by around 20% thanks to our latest technology which enables us to control more than 10 points of each cherry instead of 6 points.

FIGS

In the Bursa region of Turkey, the time for black figs is between August and October. In this period, we harvest products from orchards, pack the same day, and export freshly.

We increased our hourly cherry processing capacity from 5.6 tons to 12 tons. With Cherry Vision 3.0, we expect to increase our cherry quality by around 20% thanks to our latest technology which enables us to control more than 10 points of each cherry instead of 6 points.

Our figs are available in 6x4 punnet, 10x500 punnet and carton boxes for each size.

GRAPES

We export Sultanas, Red Globe, Black Seedless, and Crimson varieties produced by our vineyards and contracted producers in Denizli and Manisa.

Our grape season goes on in August, September, and October. In these months, we harvest our products, pack daily and send them to our customers. In November, December, and January, we export our already packed grapes from our cold storage in Denizli.

Our grapes are available in 6x750gr, 10x500gr, 2 kg, 5kg and 7kg in cartons and wooden boxes.

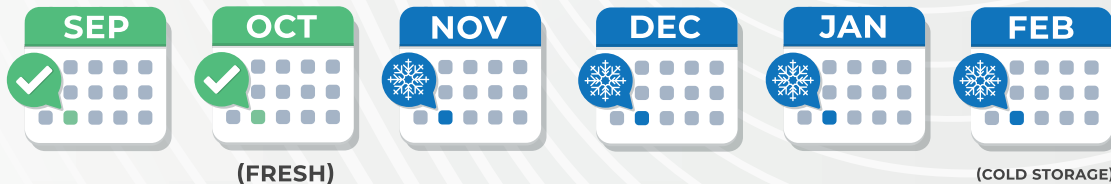

POMERGRANATE

We export our pomegranates from Antalya and Denizli regions. We provide our pomegranates fresh in September and October and from cold storage in November, December, January, and February.

With our Unitec Pomegranate Sizing Machine, we are able to pack our products with minimum human contact and the highest accuracy.

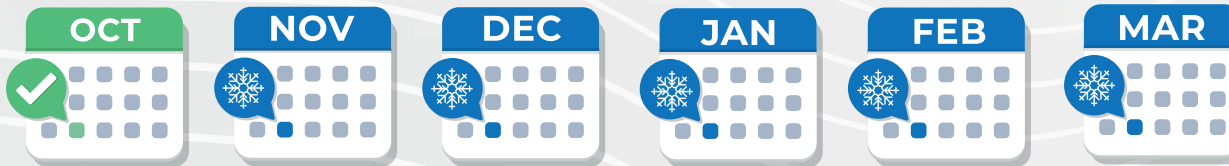

Our Unitec Pomegranate Sizing Machine sizes according to the weight, so our pomegranates are available in every kilogram our customers want.

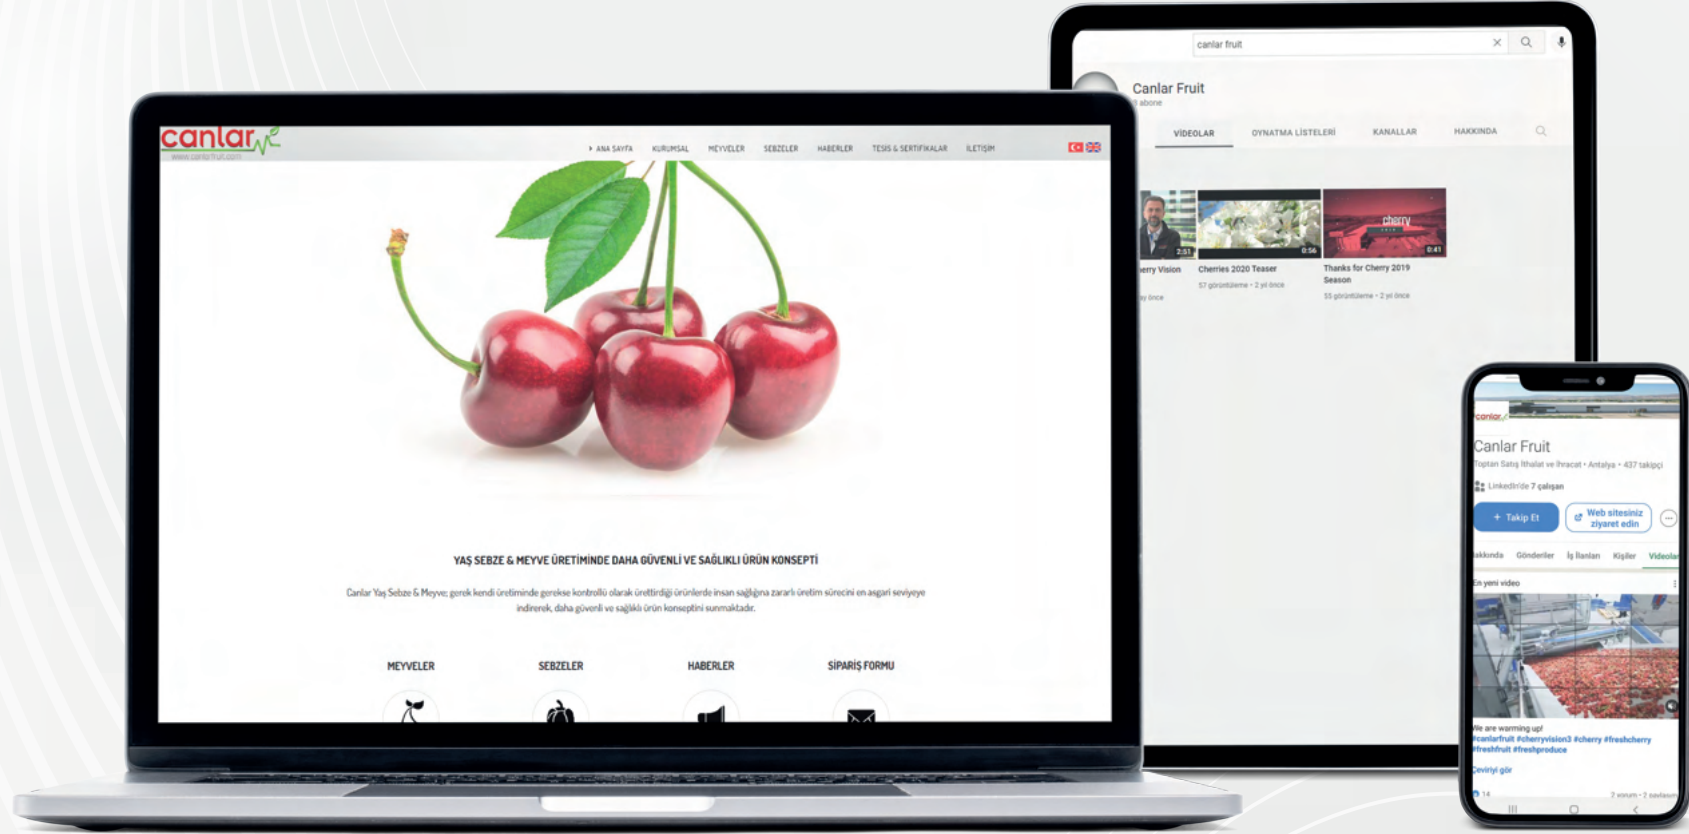

QUINCE

We export our quinces from Geyve and Denizli regions. In October and November, we pick up our quinces, pack, and export them daily, so our customers can receive the freshest quinces available. In December, January, February, and March, we offer quinces from our cold storage.

Our quinces are available in every kilogram or size according to our customer's wish.
