Click System

DREAM HOUSES products utilize Unilin locking systems, UniClik and UniDrop, which are groundbreaking, unique locking systems for floating flooring. Thanks to their easy installation features, they enable everyone to install and change their flooring quickly and effortlessly.

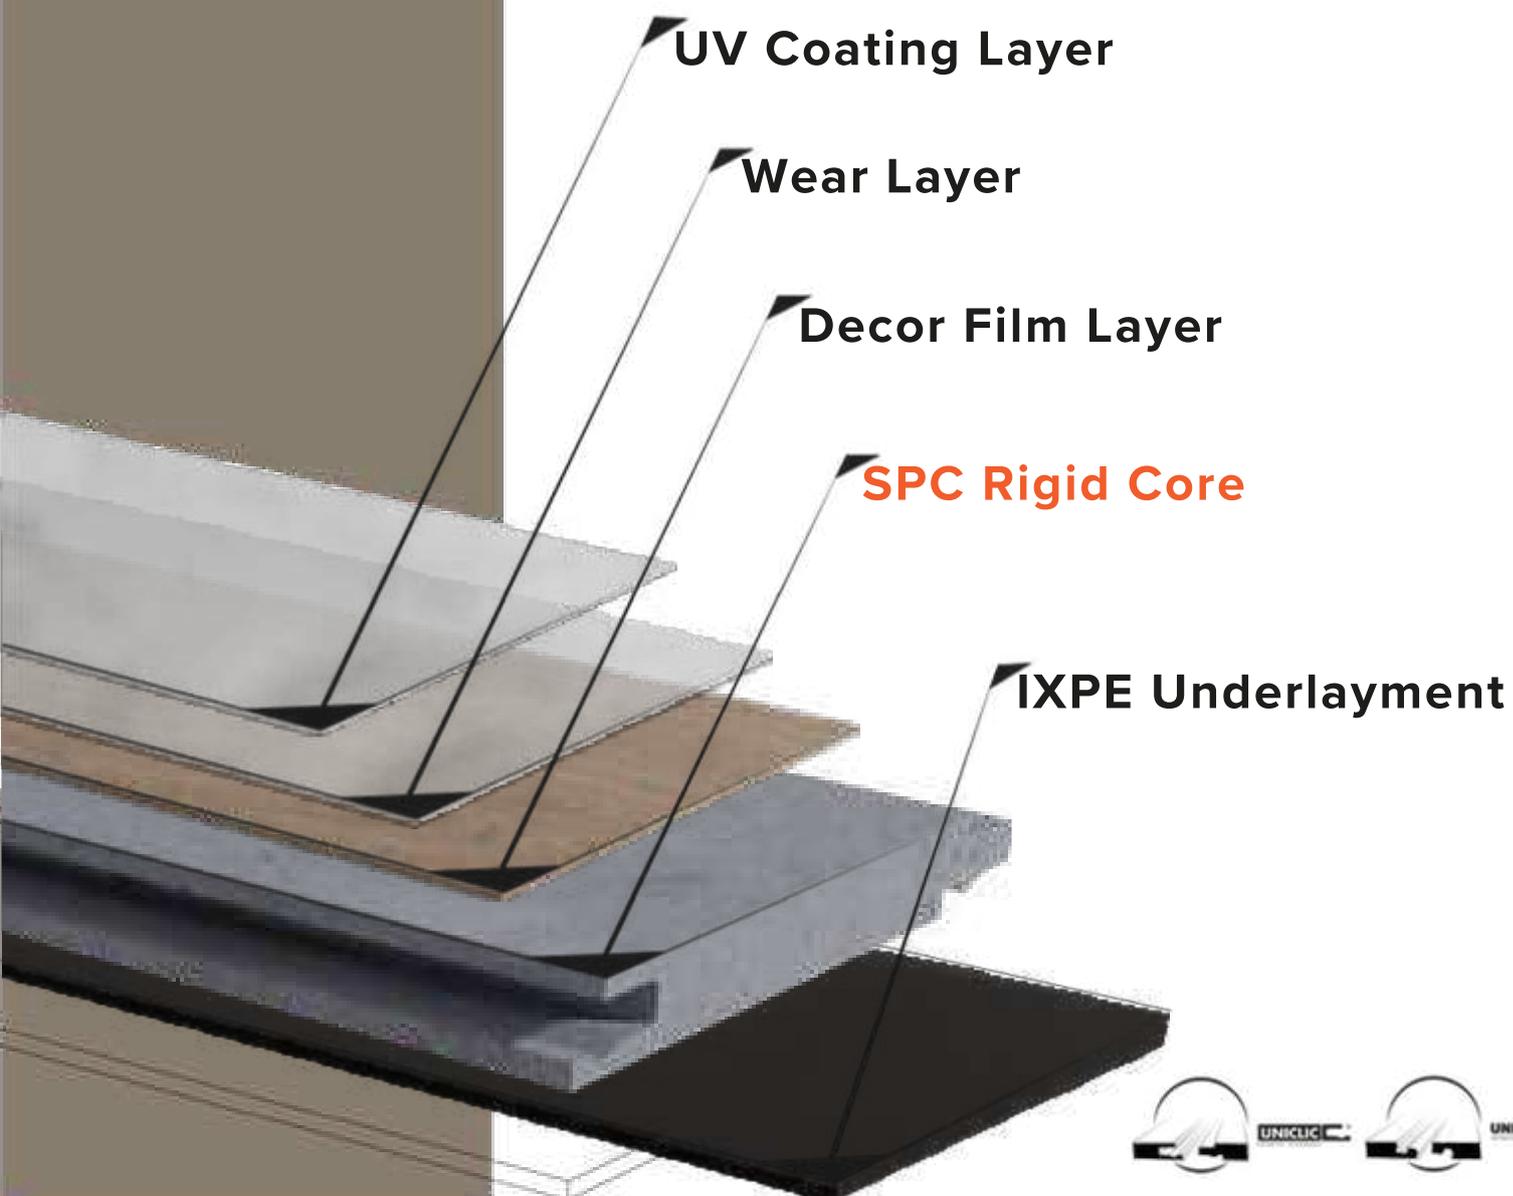

UniClik requires no additional tools or professional assistance during the assembly of its parts. It offers a fast and reliable way to install the floor.

UniDrop, on the other hand, is a one-piece, downward-folding technology that provides superior locking performance without the need for plastic parts and ensures easy installation for the short edges of the panel. This glueless locking profile is an enhanced version of the Unipush technology.

SUPREME

www.dream-tiny-houses.com

A dramatic mountain landscape with a small cabin at the base of a steep, rocky cliff. The scene is captured in a high-angle, wide shot, emphasizing the scale and ruggedness of the terrain. The sky is a deep, dark grey, suggesting a twilight or overcast day. The foreground is dominated by a large, white, triangular shape that appears to be a piece of paper or a graphic element, partially obscuring the view of the mountain. The cabin is a small, two-story structure with a dark roof and light-colored walls, featuring several windows with dark shutters. The overall mood is one of quiet solitude and natural beauty.
