

keybox KeySafe

KEYSAFE is a security keybox, managed and controlled with Omnitec's Rent&Pass system.

Designed for types of accommodation where the door lock is not to be modified, **KEYSAFE** is easily installed hanging from the door knob or attached to the wall.

Designed for tourist apartments, small hotels without 24-hour reception, aparthotels and estate agents, the operation of **KEYSAFE** simplifies management for owners and improves the experience for guests.

owner

The owner deposits the keys or MiFare card inside the **KEYSAFE** and send the guest a pin code and/or Electronic Key for opening via Bluetooth using the Rent&Pass app.

guest

The guest receives the PIN code and/or Electronic Key on its smartphone and, upon arrival at the accommodation, opens the **KEYSAFE** and remove the key or card the owner has left.

security

- Electronic Key and Code with validity adapted to the reservation type: permanent, temporary, cyclical, by time slot or single opening.
- Opening alerts configurable by the administrator.
- Anti-spy code, supports up to 10 previous and 10 subsequent digits.
- Opening, cancellation of credentials and remote audit by connection via Gateway.
- Robust, anti-impact case.
